Problems & Goal

Problems

As grow with the economy, more and more people care about their life quality instead of just making money. According to the report, the study indicates that contrast to our stenotype, most of people cooking for healthy reason or saving money than just enjoy. At the same time, people are busier than ever, it's hard to invest so much time in cooking. Therefore, how help them cook more nutrition and efficiency in cooking is a important challenge.

Solutions

With the help of technology, we can recommend people what to eat based on the nutrition fact and what do they have in the refrigerator and shop food or ingredient at home. Besides, we also propose to provide a better way for users to organize their meal plan.

01 Research

More than half of people cooking mainly for healthy reason

People also cooking because it save money

Not too many people feel cooking is really fun.

01 Research

Other up coming technology

Glasses material that can see through and can touch.

RFID that can know what you put inside or take out without scan

Voice instruction for cooking
